PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING.

THE undersigned are prepared to introduce into use in Tennessee W. E. CHILDS & CO.'S PATENT ELASTIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Con anies, and the public to examine its superiority over other ARCHITECTS AND BUILDERS should not fall to

examine this Rouging, as it is better and cheaper than any thing in use. The material forms a hard and smooth sur-face that will resist the action of the atmosphere in every climate. It is impervious to water, elastic, and flexible. it contracts and expands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to pacre, and will neither evaporate, crack nor rot, and, as to its durability, there is no question.

It is practically imperiabable, and will perfectfully resist any ordinary external exposure to fire, as is aboutdantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good heathing, old ship des, tar and gravel, tin, sinc, copper, or iron roofs—it making no difference how steep or flat they may be—for seven dollars per one hundred square feet; it being far cheaper than any Roof of the old style, and we are sure it will give better satisfaction.

will give better satisfaction.

It will also be found to be the best using ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys scottles, dormar windows, and gutters, where the tin is ruled through. This Coment can be put on to last as long as stone, and form a perfect adhesion to any ob-ject to which it is applied. Tin floofs can be painted over (and warranted not to leak) at two deliars and firty cents per hundred square feet, which is cheaper and much bet-ter than paint. This floofing will be found to be the best theng for covering inree Roofs where they are exposed to the —such as Somm Milis, Saw Mile, Foctories, Railroad Cars, Bridges, Depots, Station Houses, Steamboat Deess, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint in it, it presents no chance for fire to communicate, and any light substance will burn out without igniting.

Insurance Offices at Cincinnati, and other places where Childs & Co.'s Cement has been used, insure Buildings with 600ts occurred with this Commant, at the same rates as for those covered with Iron, Copper or Tin.

The Cement will be furnished to those at a distance with directions for resing. ith directions for using.

See Orders sent to the undersigned, through the Post-

office, will be promptly attended to J. T. NATHURST, No. 24, Spruce Street. TESTIMONIALS AND REFERENCES.

OFFICE BUCKEYS STATE INSURANCE COMPANY, To all whom it may concern: This is to certify that have examined specimens and Koofs of W. E. Childs & Co.' Elastic Fire and Water-Proof tement Roofing," and be lieve it to be eminently superior to any other kind of Roof, ing in use. I was an eye witness of a severe trial of one of these Roofs from a large volume of flame from an adjoining building, which struck directly aron, the roof and curricular building, which struck directly upon the roof and cornic for searly half an hour. It stool the trial beyond all ex-pectation, and saved the building. T. M. HARKELL, President Buckeye State Insurance Co.

CINCINSATI AGENCY ROYAL INSURANCE COMPANY, February 6, 1857.

I have examined W. E. Childs & Co.'s 'Fisatic Fire an Water Proof Cement Roofing," and, as far as I can judge consider it a great invention, and am willing to insur buildings thus protected upon the same terms as I insur-those covered by metal. Cincinnari, Jan. 7, 1857.

Having made considerable inquiry as to the merit of the 'Patent Klastic Cement Roofing,' introduced into this city by Childs & Co., I find it to be highly recommended in this city by many excellent judges; that it is meeting with very roofs and smooth patents, that its superiority over ready and general introduction, that its superiority over and finally, I expect to adopt it for my next roof, which wil be next summer—having intended to use tin, but will try
the virtues of the "Fatent mastic Roofing" as a substitute.
Yours, truly.

GROVER & BAKER'S FAMILY SEWING MACHINES, Promotes the leisure, health and happiness of home. OFFICES:

No. 15, Public Square, Nashville, Tenn., in the Store formerly occupied by W. H. CALHOUN. No. 495, Broadway, New York. No. 18 Summer Street, Boston. No. 161, Chesnut Street, Philadelphia.

Reason why this Machine is Universally Preferred over All Others.

1 Because it is the only Sewing Machine in the world ever invented, so constructed as to fully meet the demands of families for general

2 It is very simple and is never liable to get out of order. 3 It makes a seam which will not rip, though every third stitch is cut. 4 It is not a Shuttle Machine.

5 It sews with two needles, making any length stitch desired. 6 It sews from two ordinary spools, and thus all trouble at winding thread is avoided; while the same Machine can be adapted at pleasure, by a mere change of spools, to all varieties of work. 7 The same Machine runs silk or linen thread, and common spool cotton, with equal

8 This Machine will sew in the sleeves of a coat with the same ease and facility that it sews a straight seam. 9 This Machine can be run to make one thousand five hundred stitches per minute. 10 The seams are as elastic as the most elastic fabric, so that it is free from all liability to

break in washing, ironing or otherwise, 11 The stiches made by this machine are more beautiful than any other made either by hand or machine. The price of these Machines at office in New York, range from \$75 to \$150; an additional charge of \$10 only is made on each machine over New York prices at office in Nashville, to

defray expenses of importation, &c., to Nash-R. H. BROCKWAY, Sec'y., Nashville Sewing Machine Company. Prices of these Machines range from \$85 to \$150. [Mach 25-4].
